The Education Workshop is organized under the auspices of the Federation of European Biochemical Societies (FEBS) Education Committee.

Dear Colleagues,

It is our pleasure to invite you to participate in the Education Workshop Excellent Lab Book for an excellent career in the frame Better Skills for Better Jobs series .

HDBMB strives to contribute to the development of young scientists' careers, and for the fourth year in a row, in collaboration with FEBS, organizes Education Workshops on the development of professional and personal skills under the series name Better skills for better jobs.

Despite the special circumstances caused by the Covid-19 pandemic, this year we decided to organize the Education Workshop online to further emphasize the importance of quality and modern education for successful careers. Invited lecturers will present their experience in the field related to the importance of well organized lab book information.

We sincerely hope that you will recognize the importance of this topic and join us, regardless of your current position as a novice in career, young scientists, PhD mentor, principal investigator, young teacher, or experienced educator! We strongly believe that sharing experience, collaboration, and continuous education is essential for the development of Better Skills for Better Jobs!
